

# Quick Order

**Magento 2.x**

**Extension User Guide**

**Official extension page:** [Quick Order](#)

**Introduction:** Quick Order reduces the order process to several clicks for those who know the product name or SKU of the products they want to order. When a customer visits an online store, they would like to search and order the products quickly without navigating to all categories to find products. Quick Order extension facilitates this need of the customer. With the help of Quick Order extension, customers will be able to add multiple products along with required quantities in a fast and efficient way.

Quick Order can be used by logged in customers as well as guests. The Quick Order link is located at the top of the page, next to the customer name. This extension can be used extensively in the B2B eCommerce environment, where customers require a quicker ordering system.

**All Features List:**

- Enables customers to search and to order products using the quick order page without navigating to other pages.
- Customers can order all types of products.
- Different products can be easily added using dynamic rows.
- B2B customers can add multiple products quickly by specifying the SKU and the quantity of the products in a text area.
- Admin can also change the number of results needed for product auto suggest to work for the search.
